

Conglomerate of Ecosystems

blueprint of a green vision

An integrated Group in core sectors;

- **investing** globally with the spirit of an **entrepreneur**,
- **building** assets with passion of an **owner**, &
- **managing** business with discipline of a **professional**

Be a conglomerate of 'green ecosystems', through:

- **future centric** and value accretive investments,
- **return-based capital allocation**,
- **robust governance**: risk mitigation, regulatory compliance, & decentralised operational management

Footprint: Size & Scale

** As of March 31, 2023*

- Energy
- Infrastructure
- Metals & Mining
- Technology & Retail

Investment Themes

DECARBONISATION

Energy transition, climate smart, **sustainable mining & green steel** initiatives to reduce carbon footprint and promote clean energy (**SDG 7 & SDG 13**)

DECENTRALISATION

Infrastructure for a shared economy, and to create a more efficient system that reduces waste and drives greater efficiency (**SDG 9 & SDG 12**)

DIGITALISATION

Technology & Retail and leveraging AI to create cutting-edge distribution networks and platforms (**SDG 17**)

Aligned to the global need, with a focus on 'net zero' and 'positive impact', Essar is demonstrating its commitment to the UN Sustainable Development Goals (SDGs) and its role as a 'responsible global corporate citizen'.

Investment Objectives

Transition existing seed assets to 'green assets' for a post carbon economy

Transform sectors with investment in new age resources within the 'ESG' framework

Conglomerate of Ecosystems

Building Green Ecosystems of:

- **Hydrogen** along with decarbonisation initiatives for creating a sustainable industrial economy.
- **Mobility** by innovating logistics for eco-friendly transportation.
- **Steel** through supply chain decentralization by transforming mineral resource platforms in the shared economy.

Hydrogen Ecosystem

Production and Supply Side

EET Hydrogen Facility (UK):

- Establishment of a production facility in the North West of the United Kingdom.
- Operated under the EET Hydrogen brand.

Carbon Capture Collaboration:

- Collaboration with ENI for a carbon capture facility to prevent CO₂ release into the atmosphere.

Green Hydrogen and Green Ammonia Imports:

- Imports from Essar's Salaya, India production facility.
- Proximity of Salaya port ensures low-cost and easy export.

Logistics and Storage Solutions:

Stanlow Terminals: UK's largest independent bulk-liquid storage terminal. Supports storage and logistics for clean fuels in the UK.

Consumption and Demand Generation

Transitioning Stanlow Refinery:

- Transformation into the UK's first low-carbon refinery.
- Conversion to a hydrogen furnace.

Government Backing:

- Supported by the UK government as a strategic national asset.

Regional Impact:

- Supports the clean energy transition in the North West industrial belt.

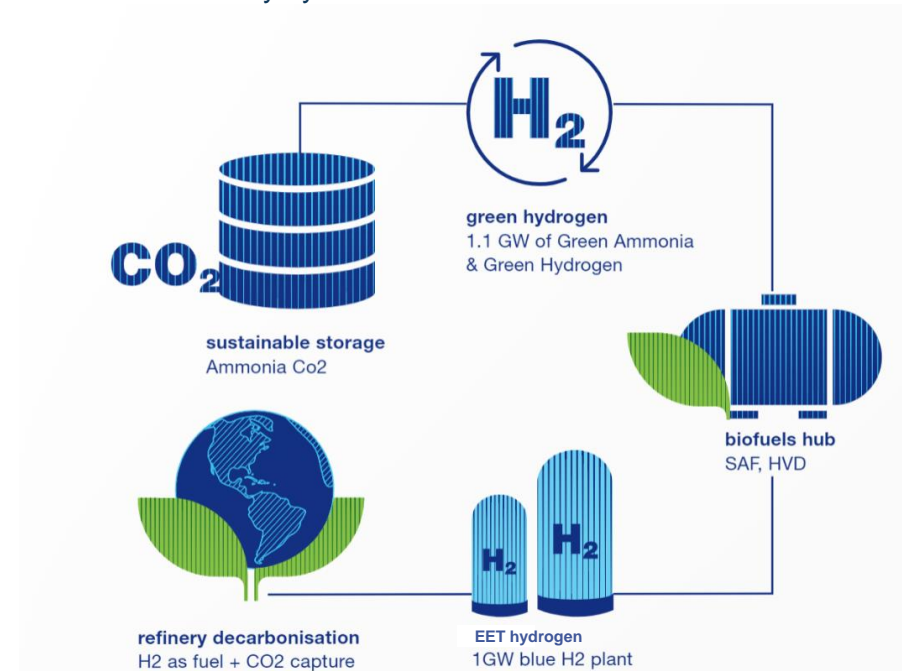

Environmental Impact

Hydrogen Generation and Carbon Capture:

- Investments to generate 1.35 GW of hydrogen, sufficient to power a city like Liverpool.
- Carbon capture to capture 1.8 million tonnes per annum, equivalent to removing 750,000 cars from the roads.

Refinery Emission Reduction:

- Essar's refinery operations to reduce emissions by half by 2030 and eliminate them entirely by 2040.

Green Mobility Ecosystem

Current Need: Decarbonisation

Global Urgency:

- Need for a decarbonized world is imminent.
- Interim fuel required as net-zero technologies evolve.

Interim Solution: LNG - Driving Global Needs

Strategic Choice:

- LNG identified as a best suitable interim fuel.
- Focus on pushing India towards becoming a gas-based economy.

Collaborative Initiatives

Terminal Development:

- Essar, in partnership with Arcelor Mittal, to build a 6MTPA LNG terminal at Hazira.

Infrastructure Expansion:

- Through Ultra Gas & Energy, developing India's largest network of 100 Internet of Things (IoT)-enabled LNG outlets.
- Future-ready for EV charging, hydrogen, bio-LNG, etc.

Industry Impact

Trucking Industry Focus:

- LNG's unmatched mileage makes it ideal for the trucking industry.

SME Catering:

- Immense value for small and medium-scale industries.
- A 100-station network catering to just-in-time requirements.

Strategic Sourcing

Sourcing Partners:

- Essar Exploration & Production, GAIL, Indian Oil.
- Collaborations with Greenline (India's first LNG logistics company) and Blue Electric (India's first LNG HCV producer).

Market Growth

Growing Clientele:

- Partnerships ensure a growing clientele in a rapidly evolving market.

Steel Ecosystem

Global Footprint: Steel-Making Capacities

Saudi Arabia:

- 4-MTPA Green Flat Steel Complex underway.
- Focus on minimizing emissions and environmental impact.

Odisha, India:

- 14-MTPA steel beneficiation and pellet plant – Largest in India.
- Utilizing pellets to minimize emissions and improve furnace productivity.

Sustainable Operations in Odisha

Green Initiatives:

- Use of natural gas and renewables to minimize carbon footprint.
- MoUs in place with Essar Power's planned solar plants.

Efficient Logistics:

- 245-km slurry pipeline for green, sustainable, and efficient logistics.
- Return water pipeline aligned with the zero water discharge principle.

Strategic Location:

- Near iron ore mines, Paradip port, and international markets for minimal environmental impact.

Future-Ready Technology in Saudi Arabia

Diverse Product Range:

- 4-MTPA Green Flat Steel Complex to produce premium-quality steel products.

Environment-Friendly Practices:

- Technologies like Pellets, DRI, EAF, and slab casting reduce power usage and carbon emissions (40-60%).

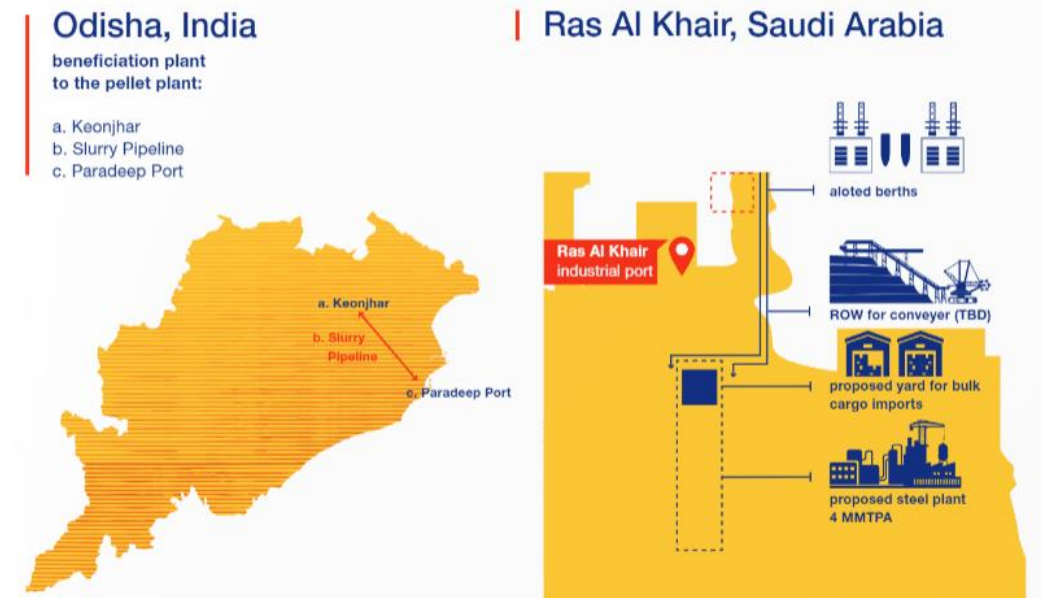

Hydrogen Integration

- Future-ready manufacturing technology to replace natural gas with hydrogen.

Efficient Product Evacuation

Strategic Port:

- Port construction for easy, swift, and clean product evacuation.

Portfolio

Energy

- Essar Energy Transition (EET)
- Essar Oil & Gas Exploration & Production Limited (EOGEPL)
- Essar Future Energy

Infrastructure

- Essar Ports
- Essar Power
- PT MBL
- Essar Projects
- Essar Shipping

Governance & Management

Board Composition

All operating companies have Board of Directors comprising of:

- **Executive Directors**
- **Non- Executive Directors (Independent and Nominee)**
- **Investor Directors**

Sub committees

Committees with delegated powers for focused oversight

- **Audit**
- **Nomination and Remuneration Committee (NRC)**
- **Corporate Social Responsibility (CSR)**
- **Risk, Reputation & Regulatory .**

Group Monitoring Committee

- Approve strategic and new investments for portfolio companies.
- Review Annual Business Plans (ABPs) and monitor portfolio companies.
- Ensure management bandwidth aligns with approved business plans.
- Develop a sustainable financing strategy for the Group.
- Maintain prudent financial policies for consistent stakeholder returns.
- Recommend shareholder nominees on the board of portfolio companies
- Implement a robust Risk Assessment, Mitigation, and Compliance system.
- Enhance Essar Brand perception and instill Core Values among stakeholders.

Avid Learning

India's Pioneering Cultural Programming Platform

Essar's cultural philanthropy arm, with firmly entrenched in India's cultural ecosystem;

Founded in 2009, Avid Learning is one of Mumbai's leading public programming platform. Avid Learning has gained a reputation for curating thought-provoking, innovative and path-breaking content spanning a variety of topical subjects and trends.

Avid Learning aims to probe meta issues and initiatives which directly impact cultural policy, education and the creative sector in India.

Staying true to its credo that **#LearningNeverStops**, the platform is continually in search of path breaking programmes and emerging opportunities for discerning audiences worldwide.

Appendix- Portfolio Assets

Energy

E&P India, Vietnam

**Diversified resources;
exploring greener fuels**

3.9 Bn BoE In place Resource

- Conventional Hydrocarbon Assets in Vietnam

12 TCF Unconventional (CBM)

- Hydrocarbon Asset - Raniganj, India
- 348 existing + 200 additional wells; 300 km pipeline
- In-place gas volumes of 14 TCF & 3P reserves of 1.1 TCF

US\$ 1 bn+ Investment till date

EET Fuels UK

**To become World's First
Green Fuel Refinery;
95% CO2 reduction & bio-
fuels blending**

- 10 MTPA Capacity; 70+ Retail Outlets
- Serves 16% of UK's road fuel demand
- Top quartile profitability - 9.1x Complexity
- In top 15% of European refineries by complexity
- US\$ 1 bn+ Investment since acquisition in 2011. Improved performance post investments

EET Hydrogen UK

**UK's first and Largest
Low Carbon H2 producer**

- 1.35GW Blue H2
- HPP1 (Phase I) represents 36% of UK Govt's initial capacity
- Operational by: 2028/29

EET H₂ Power UK

**World's First 100% H2
fired power plant**

- Hydrogen ready Combined Heat and Power Plant
- Major off taker from EET Hydrogen
- 100 MW H2 Power Plant
- Operational by 2028

EET Retail UK

**To become
UK's Leading Low
Carbon Fuel Retailer**

- Target 700 sites
- 1.9bn litres
- 2.8 mn litres per site

Stanlow Terminal UK

**UK's largest fuels storage
facility**

- 3 Mn m3 (CBM) bulk liquid storage platform: Across 2 sites (Stanlow and Tranmere), 2 cross country pipelines, 23 road gantries, jetties and berths.
- Stable Revenue: 3 CBM contracted with Essar Oil UK providing assured business
- Diversification: Pipeline of 40 potential customers to utilize spare capacity

Exploration & Production

Geographically diversified E&P portfolio with proven prospects

Essar Exploration and Production Ltd (EEPL) holds geographically diversified conventional and unconventional assets portfolio with significant prospects

Global E&P exposure

Vietnam

~5.4 BBOE of combined in-place

- Block with four prospects with available mix of Oil, Gas and condensate.

India

~12TCF of in-place resources of Unconventional asset in the most high growth gas market

Nigeria

~250mmbbl of Oil and 1.1 TCF of gas in place

Investments:

US\$1000mn investment till date

Production Ramp up along with Fuel and geographical diversification

Vietnam:

- Declared one of the largest gas field discoveries (Ken Bau) of Vietnam by IHS Markit and Wood Mackenzie.
- 45% ownership in partnership with ENI

India:

- First Indian E&P company to achieve over 1mmscmd of CBM production and delivering highest production of 82BCF till date
- Plan to invest over \$250m in expanding production

**KEN BAU FIELD - A HISTORICAL DISCOVERY
OF VIETNAM'S OIL AND GAS INDUSTRY**

ENERGY VOICE
Leading the global energy conversation

Essar Oil & Gas Exploration & Production Ltd

To contribute 5% of India's Natural gas production by 2030

Overview

- ❑ **Pioneer of UHC:** Pioneer of Unconventional Hydrocarbon Development in India since the 1990s. Successfully completed Exploration & Development Phase, now in Production Phase
- ❑ **Largest CBM producer:** First company in India to produce more than **1mmscm of CBM** per Day. Achieved highest CBM production of **90 BCF** till date
- ❑ **Extensive acreage & resource base:** ~500 sq. km acreage with In-Place Resource of **12 TCF**
- ❑ **Infrastructure strength:** state-of-the-Art facilities includes **450 wells** drilled in **82 well pads**, **5 GGS stations** and one MCS with capacity of **3 mmscmd**, **300kms** pipeline network and largest water treatment RO facility.
- ❑ **Long term contract:** Long term Gas Sale and Purchase Agreement with Maharatna GAIL Limited for a period of 15 years
- ❑ **Cost efficient:** EOGEL is world's **top decile lowest cost unconventional gas producer**

Future / Expansion

- ❑ **Enhance Production:** Develop **600** new vertical, deviated and horizontal wells to achieve production of ~5.2 mmscmd in next 4 fiscal years;
- ❑ **Exploring Shale:** First company in India to obtain environmental clearance for exploration of **Shale gas**

EET - Fuels

To become World's First Green Refinery – 95% CO₂ reduction

The Essar Energy Transition Opportunity

- ❑ EOUK's main asset is Stanlow refinery (10mtpa - 16% of UK's road fuel demand), one of the most advanced refineries in Europe (top 15% in Europe by complexity)
- ❑ **US\$0.9bn capex plans to transform Stanlow** into world's first green refinery
- ❑ Stanlow will become **World's First Green Refinery** - 95% CO₂ reduction & bio-fuels blending
- ❑ Unique competitive advantages:
 - ❑ Access to Hydrogen (EET Hydrogen) and
 - ❑ Proximity to CCUS

Significant investments to decarbonise the refinery

World's first green refinery - 95% CO₂ reduction by FY30

Tear Sheet

World's first green refinery	<ul style="list-style-type: none">• 95% reduction in CO₂ emissions (2mtpa) by FY30• CO₂ reduction by<ol style="list-style-type: none">1) Hydrogen Fuel Switching2) Industrial Carbon Capture3) 100% H₂ Fired CHP

EET - Hydrogen

World's Leading 4GW Low Carbon Hydrogen plant with compelling economics

Overview

❑ Catalyst of UK's Low Carbon Hydrogen Economy

- Project has received government approval for CfD (Contract for Difference) mechanism for 350MW (HPP1)
 - EET Hydrogen will also pursue opportunities beyond HPP1 into HPP2/3/4, Green H2, projects and mobility
- 1 of 2 projects (HPP1) in the UK which has received Government approval
- 1st project (HPP1) to commence operations in the UK

❑ Leverages Huge Captive Market in the North West

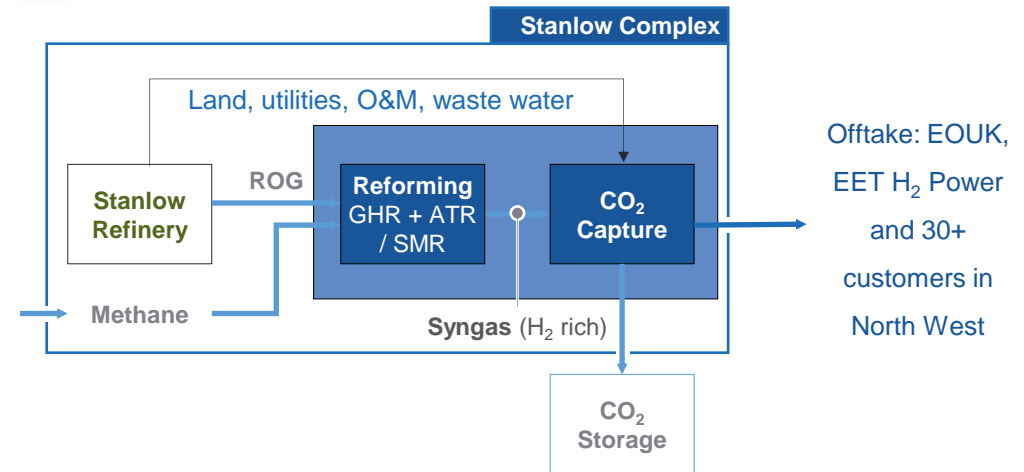

- Exclusive hydrogen player in the North West cluster
- EOUK as anchor offtaker out of 3-4 GW of demand from 30+ customers in North West

❑ Government Revenue Support

EET Hydrogen – Contribution to Total FY30E EBITDA

Technology (HPP1)	Gas Heated Reformer (GHR) Autothermal Reformer (ATR)	Energy Source	Natural Gas + ROG
Technology (HPP2, 3 & 4)	Steam Methane Reformer (SMR)	Annual Offtake	Refinery for Plant 1 and wider HyNet NW Cluster for Phase 2-4
Key Products	H2 - 11 TWh p.a. for HPP1 and HPP2	Permits	Existing Security Approvals and Environmental Permits

EET – H2 Power

EET H2 Power will be the First 100% H2 Fired Power Plant Globally

Overview

- ❑ **First of-its-kind H₂-powered power plant globally**
- ❑ **Capacity of 100 MW in the UK (Stanlow)**
 - To be developed in two phases: COD in FY27 and FY29
- ❑ **Customers: EOUK, EET Hydrogen & Third Parties**
- ❑ **EET Hydrogen to supply H₂**
 - Multi-fuel plant – can also operate on Natural gas and RoG
- ❑ **Capex optimisation through modularisation**
 - Capex: \$275m
 - Leverage on modularisation strategy for construction to optimise costs and schedules
 - EBITDA of \$80m through sale of power and steam
 - CO₂ savings - additional benefit

EET H₂ Power – Contribution to Total FY30E EBITDA

Infrastructure

Infrastructure

Essar Power Canada / India

Focused on transitioning into sustainable energy portfolio

Algoma Power, Canada

- 85MW co-generation power plant
- Assured offtake – PPA

EPGL 1, Gujarat

- 1,200 MW thermal power plant at Salaya

Essar Ports India

One of the fastest growing private sector port & terminal developer

- Current capacity: 20MTPA in Salaya, Gujarat
- Fully mechanized state of the art capacity
- Operate at 15 mt with third party tie up.

PT MBL Indonesia

One of the fastest growing coal mining company in Asia

- High grade thermal coal 5800 GAAR
- Total mining: 20MTPA
- Own mines: 10MTPA
- 3rd Party mines: 10MTPA

Essar Projects Global

Leading EPC company delivering innovative end to end solutions

- Experienced EPC company: US\$10bn+ projects executed

Essar Shipping & OGD Services India

Engaged in offshore and onshore oil field drilling shipping and OGD services

- Owns and operates an offshore semi-submersible drilling rig, Essar Wildcat
- To complete construction of two Jack-Up Rigs at an investment of US\$ 130 mn

Essar Power

Harmonizing baseload thermal with new green energy sources, to power a cleaner, brighter future !

Overview

Current Businesses:

- **Essar Power Gujarat Limited (EPGL):** A 2 x 600 MW imported coal based power plant with sub-critical technology- Entire capacity is tied up with Gujarat Urja Vikas Nigam Limited (GUVNL) under a long term Power Purchase Agreement (PPA).
- **Essar Power Canada Limited (EPCL):** Step down subsidiary of EPGL operates an 85MW co-generation facility in Sault Ste. Marie, Ontario, and solely provides electricity to Algoma Steel, Inc (ASI) through Ontario Power Authority.

EPOL has implemented & monetized the following plants:

Vadinar Power Company Ltd	Bhander Power Ltd	Essar Power (Orissa) Ltd
- 1010 MW Thermal Plant	- 500 MW Co-gen. Plant	- 600 MW Thermal Plant
Essar Power MP Ltd	Essar Power Hazira Ltd	Essar Power Transmission Company Ltd*
- 1200 MW Thermal Plant	- 270 MW Thermal Plant	
Essar Power Limited		
- 515 MW Co-gen. Plant		

Expansion Plans

- ❑ Additional 2 x 800 MW domestic coal-based ultra supercritical power plant in Salaya;
- ❑ 6 GW of Renewable energy consisting both solar and wind energy.
- ❑ Pump storage Hydro for ensuring RTC
- ❑ Lithium Refinery and Battery Assembly Plant
- ❑ Solar Module Manufacturing Plant

PT Manoor Bulatn Lestari

To become the leading coal mining company in Indonesia

Overview

- ❑ **100 MMT+ reserves of rare high GCV coal in Indonesia**
 - Indonesia has a production of around **700 MMTPA** out of which this type of coal is produced @ **100 MMTPA of high GCV coal**
 - MBL coal having good blending of **low Sulphur** and **high AFT** making this a highly sought after coal; Ideal for the premium markets of **Japan, Korea, Taiwan** and **China**
- ❑ **Exponential Growth**
 - PT MBL has been on an exponential growth track since inception by crossing more than **1 MMT** production in second year of production (2023), which is to be ramped up to **7 MMT in 2024**

Expansion Plans

- ❑ **Expansion to 10 MTPA production**
 - PT MBL is on track to achieve **10 MTPA** production by **2025** – a rare, if not unique achievement for a new mine
 - MBL is actively exploring various green technologies to be used in its operations including **solar + battery** and **electric heavy duty equipment** and leading the path for sustainable mining in Indonesia

Essar Projects

To become World's leading EPC Company by 2030

Overview

❑ Ongoing EPC Projects

- Across Oil & Gas, Minerals & Metals, and Infrastructure sectors in India, Middle-East, Africa & SE Asia for **KIPIC, TOTAL, Dangote, PNG Govt., Bahrain Steel, Jindal Group** & others
- Engineering & Consultancy Services, DPR Preparation, Construction Supervision for various projects; Construction works for Steel Plants, Pellet Plants, Beneficiation Plants, Slurry Pipelines, Blast Furnace, Refinery, Tank Farm, etc.; Refinery Commissioning

❑ Successfully executed Megaprojects of over USD 11 Billion in the last 50 years across various sectors spanning diverse geographies

- **35 MMTPA Refining** capacity; **6.45 MMCM** of Tankages capacity; Over **5,500 km** of cross-country Oil & Gas, Water and Slurry **pipelines**; Over **3,900 MW** of **Power Generation** capacity; **10 MMTPA** Integrated **Steel Plant complex**; **27 MMTPA** capacity of **Beneficiation** and **31 MMTPA Pelletization Plants**; **160 MMTPA Ports** capacity

Future Projects (in Pipeline)

- ❑ Exploring opportunities in Oil & Gas, Minerals & Metals, **Renewable Energy, Data Centers**, Infrastructure through tie-ups, subcontracts and technology sharing agreements

Metals & Mining

Green Steel Arabia Saudi Arabia

Largest flat Green steel complex across entire MENA region.

- Building a 4-MTPA steel plant in Ras Al-Khair, Kingdom of Saudi Arabia (KSA).
- Flexibility to use H₂ as reducing agent in the DRI plant.

Essar Minmet India

Leading environment friendly pellet plant

- A 14-MTPA Iron Ore Pellet project in Paradip, Odisha
- To deliver high quality pellets of DR and BF grade
- State of the art technology with Low carbon emissions

Mesabi Metallica USA

World class pellet facility at Nashwauk, Minnesota

- 7 MTPA DR grade Iron Ore Pellet Making
- Target market – North American steel producers
- Access to 1.7bn tonnes of high grade iron ore
- US\$1.5bn invested till date

Green Steel Arabia – Essar's 4 MTPA Flat Green Steel Project

To become MENA region's First Green Steel Complex – by 2030

Building the Green Steel Benchmark in Saudi Arabia

- ❑ 4 Million Tonnes of Premium Grade Flat Steel produced in Ras Al-Khair, to cater to country's demand of 7 MTPA
- ❑ Creation of about **2,000+ Direct jobs** in the region
- ❑ Aim to substitute Imports worth **USD 3.3 Billion**
- ❑ Total Value Addition to KSA's economy estimated at about **USD 4.1 Billion annually**

85% Reduction in CO₂ emissions by FY 2035 (Target: < 0.3 T per T of steel)

- ❑ Maximize use of Hydrogen as Fuel Source
- ❑ Carbon Capture and Sequestration
- ❑ Renewable Electricity

Essar Minmet

To lead the transformation of the supply chain for green and sustainable steel

Overview

- ❑ Essar Minmet Limited (EML) is setting up a **14 MTPA Integrated Pellet Plant** in split location in Odisha, India
- ❑ Beneficiation plant is located at **Keonjhar District in Odisha**, in close proximity to iron ore mines and the pellet plant is located at Paradip. The **Beneficiation plant** and **pellet plant** are connected by a **250 km slurry pipeline** for transportation of concentrate in the form of **Iron Ore Slurry**.
- ❑ The Pellet plant will produce international quality **63% Direct Reduction Grade (DR Grade)** as well as **37% Blast Furnace grade (BF grade)**. Plant will cater to the growing demand in both, domestic and International markets.

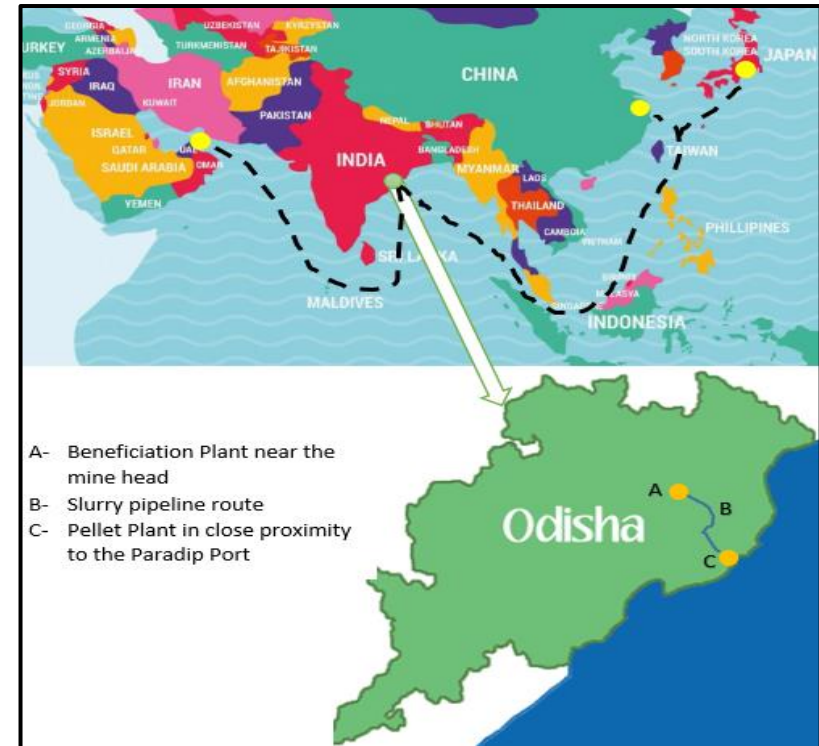

\$2344 mn
Revenue
(projected)

\$820 mn
EBITDA
(projected)

\$1.7 bn+
Capex (as per
TEFR)

Expansion Plans

- ❑ Acquiring different iron ore mines of reserve about **400 million tons**
- ❑ Sourcing entire power requirement of **120 MW from renewables**
- ❑ DRI Units and Integrated Steel Plant

Mesabi Metallics

To lead the Green Steel Transition by 2030

Overview

- **Mesabi's Under Construction Taconite Mining and DR pellet project**
 - Essar is a 100% equity owner and investor in Mesabi Metallics
 - Land parcel In Nashwauk, Minnesota of 16,000 acres
 - Only Permitted Steel plant in Minnesota with DRI Capacity of 1.8 MTPA and Steel plant capacity of 1.5 MTPA
